### Education

---

2021/09 – 2024/07      **Computer Engineering**  
Ariana, Tunisie      *Esprit*

2018/09 – 2021/06      **Bachelor's Degree in Electronics, Electrotechnics, and Automation**  
Monastir, Tunisie      *Fsm*

### Professional Experience

---

2024/03 – 2024/09      **Full Stack Java/Angular Developer (PFE)**  
Ariana, Tunisie      *Uptech*

- Designed and developed a web application for stock , leveraging RFID data and an AI model for detecting and tracking product positions across various zones.
- Managed the codebase using polyrepo with GitLab CI/CD for deployment pipelines, integrated SonarQube for code quality analysis, and used the ELK stack for monitoring.
- Worked in an agile environment, implementing best practices for security, scalability, and AI integration.
- **Technologies:** Spring Boot (microservices), Angular, Keycloak for user management, MinIO for storage, RabbitMQ for asynchronous communication, Zipkin for distributed tracing , PostgreSQL, Docker, Kubernetes, GitLab, SonarQube, Jira, ELK.

2024/01 – 2024/02      **Freelancer**  
      *IntEdGroup*

- Gestion des logements et des réservations
- <https://ims.intedgroup.com/> 
- Technologies : Node.js, Angular, MongoDB

2023/08 – 2023/09      **Backend Java Intern**  
CNN, Tunisie      *Yellow-IT*

- Implemented the Facebook API for lead generation in the CRM section.
- Authorized the administrator to post messages on the Facebook page and assign interaction lists.
- **Technologies:** Spring Boot, Spring Data JPA, Spring Security, Angular, MySQL, Git.

2023/06 – 2023/08      **Java/Angular Intern**  
Ariana, Tunisie      *Digi Smart Solutions*

- Studied, designed, programmed, and implemented a web application to manage the company's daily activities.
- **Technologies:** Spring Boot, Spring Security, Spring Session, Angular, MongoDB, Git, Bootstrap.

2022/07 – 2022/08      **Python Intern**  
Mahdia, Tunisie      *Tunisie Telecom*

- Overview of mobile network generations. Measured and analyzed network quality.
- **Technologies:** Python, Nemo Outdoor.

## Projects

---

2023	<b>DevOps Project</b> <i>Esprit</i> <ul style="list-style-type: none"><li>• Spring Boot project management with Maven, continuous integration and automation with Jenkins Pipeline.</li><li>• Backend testing with Mockito, code quality with SonarQube and JaCoCo.</li><li>• Artifact hosting with Nexus, containerization with Docker and Docker Compose.</li><li>• Data monitoring with Prometheus and Grafana.</li><li>• <b>Technologies:</b> Maven, Jenkins, Mockito, SonarQube, JaCoCo, Nexus, Docker, Docker Compose, Prometheus, Grafana.</li></ul>
2023/07 – 2023/11	<b>Modeling &amp; Automation of a Complete Workflow System</b> <ul style="list-style-type: none"><li>• Developed a Workflow Process Management module (linear and complex processes).</li><li>• <b>Technologies:</b> Java EE, Spring, Angular, JBPM, Git.</li><li>• <a href="https://github.com/Aladdinne/workflow.git">https://github.com/Aladdinne/workflow.git</a> </li></ul>
2023	<b>Integrated Development Project</b> <i>Esprit</i> <ul style="list-style-type: none"><li>• Studied, designed, and developed a full-stack website for managing various camping services.</li><li>• Developed backend Web Services and front-end interfaces.</li><li>• <b>Technologies:</b> Java, Spring Boot, Angular, GitHub, MySQL.</li></ul>
2022	<b>Integrated Development Project</b> <i>Esprit</i> <ul style="list-style-type: none"><li>• Studied, designed, and developed a web application and a desktop application for educational services.</li><li>• <b>Technologies:</b> PHP, Symfony5, Java, JavaFX, MySQL, Bootstrap.</li></ul>
2021	<b>Final Year Project (PFA)</b> <i>FSM</i> <ul style="list-style-type: none"><li>• Studied, designed, and developed systems for lane detection, car detection, and fatigue detection, implemented on Pynq Z1 and Jetson Xavier NX embedded processors.</li><li>• <b>Technologies:</b> Python, OpenCV, TensorFlow, Scikit-Learn, Keras.</li></ul>

## Skills

---

### Programming Languages :

Java , JavaScript , TypeScript

### Frontend:

Bootstrap , JQuery , HTML5 , CSS3 , SASS

### Tools :

Docker , Kubernetes ,Jira , GitLab CI , Maven , NPM ,  
Jenkins , Postman , Grafana SonarQube , Nexus ,  
Kibana , Azure devops

### Dev Tools :

Visual Studio Code, IntelliJ, WebStorm, Eclipse ...

### Collaborative Work Platform :

Jira , Git

### Frameworks :

Spring Boot , Spring Security , Spring MVC , Spring  
batch , Spring Cloud, Hibernate JPA , React , Angular

### Database Management Systems :

MySQL , PostgreSQL , MongoDB , Redis

### Architecture :

Microservices , Monolithique

### OS :

Linux ( CentOS , Ubuntu ) , Windows

### Work Methodology :

Agile-scrum

## Languages
